Try **Online Engine** before you buy

Online Test Engine: Online Tool, Convenient, easy to study. Instant Online Access. Supports All Web Browsers.

PDF format: Easy to read and print learning materials, our products are available in PDF file format.

Desktop Test Engine: Installable Software Application. Simulates Real Exam Environment. Practice Offline Anytime.

What Client's Say

"I passed today with score 80%. I confirm that it's valid in UK. Focus on "Correct answer" and forget the "Answer X from real test". I had free new questions.

Sebastian
★★★★★

"Questions from this HPE0-S51 dump are 100% valid... not all answers. I passed this exam a few days ago (in France) and got these results.

Wayne
★★★★★

Exam : **C2150-610**

Title : IBM Security Identity
Governance and Intelligence
V5.2 Deployment

Vendor : IBM

Version : DEMO

NO.1 A new fix pack has been released by IBM Customer Support This fix pack contains the second released Firmware Upgrade.

When the first Firmware Upgrade was released, the deployment professional created 0 backup of the original firmware in the first virtual appliance partition and then proceeded using the second partition.

Before applying this second Firmware upgrade, the deployment professional wants to create another backup for the current firmware. How should the deployment professional proceed?

- A.** Create a backup in the second partition, and then proceed with using the first partition, overwriting the first backup.
- B.** Create backup in an external drive.
- C.** Create the third partition and backup the current firmware.
- D.** Take advantage of the multiple backup feature and create the backup of the current firmware in the first partition again.

Answer: C

NO.2 A client's business requirement includes having a one-stop User Interface for the person who manages relations and "upping between governed applications' permissions and enterprise business activities.

At a minimum, access to which IBM Governance and Intelligence (IGI) module(s) must be suggested by the deployment professional to satisfy this requirement?

- A.** Access Governance Core
- B.** User-Account matching, Access Requests, and Access Certifier
- C.** Business Activity mapping
- D.** Business Activity mapping and Access Requests

Answer: C

NO.3 The IBM Security Identity Governance and Intelligence (IGI) Central Administration Console returns an error during login. What should be done by the deployment professional to determine the cause of the "loginerror?error=error.2000 * error?"

- A.** Verify that the database is connected to the appliance.
- B.** Verify that the 10AP directory has been started.
- C.** Verify that the application server has been started
- D.** Verify that the host file is correctly set up

Answer: C

NO.4 The deployment professional imported a significant number of users in Access Governance Core module using the Bulk Load feature. Just after importing, the file imported is declared incorrect by the customer.

How can the deployment professional proceed to restore the state before this operation?

- A.** Set the other appliance partition that was previously backed up to Active.
- B.** The state of the data can be restored only if an external backup of the database has been done.
- C.** Apply a previously created snapshot.
- D.** Restart the virtual appliance before confirming the commit of the data.

Answer: B

NO.5 A deployment professional has scheduled a task every night in Task Planner module. Sometimes this task performs unexpectedly. Many operations are performed during the day. However, one day after the task is performed, the deployment professional is not able to find any night-related log entries. The related Support Files only show entries starting from 10:22 AM. What should the deployment professional do to properly discover the issue and gather useful Support Files?

- A.** Assure that logging level is set to DEBUG.
- B.** Schedule the Support Files generation during the night, right after the issue involved task.
- C.** Increase the maximum size for log file rotation and/or the maximum number of historical tog files.
- D.** Stop other nightly tasks.

Answer: C
